

Landscape Minutes February 2019

All committee members present.

Plants

There have been no new requests for service. The plant ladies will walk the property with Paula from Serpico, on Tuesday, February 19th. They will look at the front areas on SVD where the cherry trees were removed.

Trees

The tree ladies walked with Brendan to review the removal of the cherry trees. The trees were removed. Next spring a plan will be designed to replace trees in areas where they will have room to grow. In the areas too small for a tree to grow and thrive, new plantings will be installed.

The cherry tree project is being paid for out of the reserves budget as a capitol improvement to the HHV HOA.

The committee reviewed the proposal from Serpico to deep root fertilize the trees. Nine smoke trees and 21 weeping cherry trees will get a deep root fertilizing. The oaks will not be fertilized at this time. The bid was approved with the removal of the oak trees from the bid.

Budget

The new controller, controller C, will be installed before the end of the 2018 budget year. It will be paid for out of the capitol improvement budget.

This leaves sufficient funds to mulch and add some additional rocks borders.

Next meeting March 13th.
