

Karen, Betsy, Pam, & Bet by FaceTime present. Yvette & Akiko excused.

Plants Report

Bet reported that all of the plants ordered on the last bid have been installed.

As requested by the Board the landscape in front of 409 Hiller was examined. At this time the watering system is functioning correctly, and the plantings have not been disturbed.

The October plant walk is to be scheduled.

Trees Report

Homeowner 'requests for service' have been received. Pam & Betsy walked with Brendan to look at the work requested. At this time we are waiting for a bid from Serpico.

Homeowners at 409 Hiller & 411 Hiller have requested that the Live Oak trees behind their houses be trimmed. The trees do not appear too close to the houses. The Board will discuss this request further and review the Oakland tree ordinance.

Betsy & Akiko did a tree walk with Brendan to examine the cherry trees & determine which will be the first to be replaced. How many trees to replace this year will be determined by how much money is left in the tree budget after homeowner requests are completed.

Discussion followed about homeowner requests for view restoration. These requests usually involve several trees and are very costly. The possibility of having homeowners split the costs, as is done with fences, will be presented to the Board.
